

Day 9 Python Challenge

I'm a little tired at this point of the day, so let's do something different. Instead of explaining the details of today's project, you're going to have to find them yourself. 😊

Along with this lecture, you will find a downloadable zip file. Download it and save it in the same folder where you're going to save your .py files for this project. I want you to unzip that file to find the instructions for this project.

Don't cheat! The idea is that you unzip that file using the code you've learned today. There you will find a file called **Instructions**, which has everything you need to get started.

Let's get to work and I'll see you in a little while to show you if your solution is correct for today's project.
